

# API integrations and partnerships

Partnerships and custom integrations with our AI enhance the ways that you do business

Speakserve

## Integrations that enhance the ways you do business

Share valuable data, streamline processes and add functionality using our API

Many businesses have carefully planned processes that need to be enhanced and not disrupted by a new provider. No matter what your needs are if you are looking for a way to add functionality into your existing systems, we can help.

Our architecture is designed for scalability and resilience and because we own our technology we can provide greater flexibility when it comes to adding new functions and integrations that enhance your existing in-house processes.

## How do you benefit?

Reduce complexity by adding new functionality into your pre-existing processes

Share clean and timely, data across your organisation

Provide a familiar experience to your users and participants

Integrate secure remote tools and turn on and off functionality where you need it most

Stay up to date, we roll out regular updates and refreshes so you can be sure that your platform will perform over time

## Strategic **partnerships**

We are always looking for ways to partner with other experts and industry innovators

As a technology company we are always looking for new ways to incorporate our own technology with other trusted providers.

Although we are always looking at new ways to improve and diversify our own technology, we know that there are so many amazing new products and specialist tools appearing in the market place at rapid pace.

As a cloud business with a hyper resilient and scalable architecture we are passionate about our code, and build our technology with simplicity and future integrations in mind. This means that we can bring together other best-in-class software and enhance it with ours, or vice versa.

## How do you **benefit?**

We can provide access to our API to help develop the integrations

Dedicated team of telephony experts and world class developers

We own our own technology and are in control of our development roadmap

We are passionate about building industry specific solutions with complementary product capabilities

We only partner with selected specialist partners that we feel can provide the best experience for our clients

“ We are always challenging the status quo and looking for new innovative ways to be better for our customers, that's why it's so important to us that we only work with expert partners that are equally as committed to driving value into our clients businesses.”

Jonathan Grant, CEO
